

Key Selling Points

4-Valve Internal manifold

The AK940 is a digital refrigerant system analyzer with a 4-valve manifold allowing for a diverse and efficient workflow.

Complete Kit "ready to go"

It comes ready-to-test as a "complete kit", including 3 60 inch, three-layer charging hoses, 2 thermistor temperature clamps and 2 R410A adapters. None of our direct competitors offer a comprehensive accessories package with their analyzers. To judge fairly, comparable accessories need to be added to the cost of their analyzers.

12-Parameter Display

The AK940 has a 12-parameter backlit display. Built specifically to show all testing results at once including a relative bar graph. No competing manifold has as much information on-screen at one time. And is backed by a 1-Year limited warranty.
