

Key Selling Points

Three-In-One

The Sliding Jaw Clamp* combines a fork meter, a current hook and voltage tester into a single combined solution. The low profile sliding jaw allows for easy access in tight spaces while the closed clamp head provides better accuracy than open fork or current hook options.

Essential Functionality

This CATIV rated meter offers AC and DC voltage, AC Amps, resistance, continuity, LRA inrush and data hold.

Features

The DL220 has a good feel with its ergonomic design and thumb lever that slides the clamp jaw open and close. It features connected test leads, built-in test lead storage and a bright backlit display.

Competitive Comparison
