

Key Selling Points

Circular Laser Targeting

The INF145 circular laser eliminates all confusion about the target area being measured. An 8-spot circle easily indicates the spot being measured.

HACCP Zone Checks

The INF145 is NSF certified making it suitable for food applications while the HACCP zone-check flashes indicators on both the display and faceplate to let you know when food temperatures are within proper serving ranges. The color-coded warnings flash red or green for easy visibility.

NSF Certified

The INF145 offers both non-contact measurements with the IR thermometer or contact measurements from the fold-out temperature probe providing you application versatility.

Competitive Comparison

Brand	UEi	Fluke
Model Number	INF145	FP FoodPro Plus
Infrared Temperature Range	-76° to 662°F (-60° to 350°C)	-30° to 525°F (-35° to 275°C)
Probe Temperature Range	-76° to 662°F (-60° to 350°C)	-40° to 392°F (-40° to 200°C)
Emissivity	Adjustable 0.1 to 1.00	Pre-set for food applications
