

UEI NCV2

TEST INSTRUMENTS™

Non Contact Voltage Tester

CONVENIENT POCKET-SIZE ELECTRICAL TESTER

- Non-contact 50 - 1000VAC
- 50-60Hz
- Bright LED Indicator
- Audible Alert
- Built in Battery Tester
- Three Year Limited Warranty

NCV2 • Non Contact Voltage Tester

Detection is positive and trouble-free. You can hear the NCV2's loud and clear detection tone and see its super bright LED indicators even if you're in a noisy, poorly lit industrial environment.

- **Checks for live voltage without touching conductor.**
- **ON/OFF and Battery Check**

To turn tester on and check the condition of the battery prior to use, slide pocket clip toward front. If LED lights, batteries are good and you can continue. If not, replace batteries. Turn off after use.

Operation

Verify operation: Test on a known live wire before use.

To check live voltage, hold the probe tip against the voltage insulator, or fully insert into hot and neutral sides of electrical receptacle. If AC voltage is detected the tip will flash and a loud chirping sound will be heard.

Battery Replacement

Open door by prying off back of battery clip with small screwdriver. Insert batteries. Replace cap.

The NCV2 has the following features:

- Non-contact AC voltage test: from 50 - 1000V AC
- 50 - 60Hz
- Bright LED Indicator
- Audible/Visual indicators
- Built in Battery Tester
- Three year Limited Warranty

Standard Accessories:

2(AAA) Batteries
